

Setting Up Application Environment

- Create Flask Project
- Create IBM Cloud Account
- Install IBM Cloud CLI
- Docker CLI Installation
- Create An Account In Sendgrid

Implementing Web Application

- Create UI To Interact With Application
- Create IBM DB2 And Connect With Python

Integrating SendGrid Service

- SendGrid Integration With Python Code
- Deployment Of App In IBM Cloud
 - Containerize The App
 - Upload Image To IBM Container Registry
 - Deploy In Kubernetes Cluster

Ideation Phase

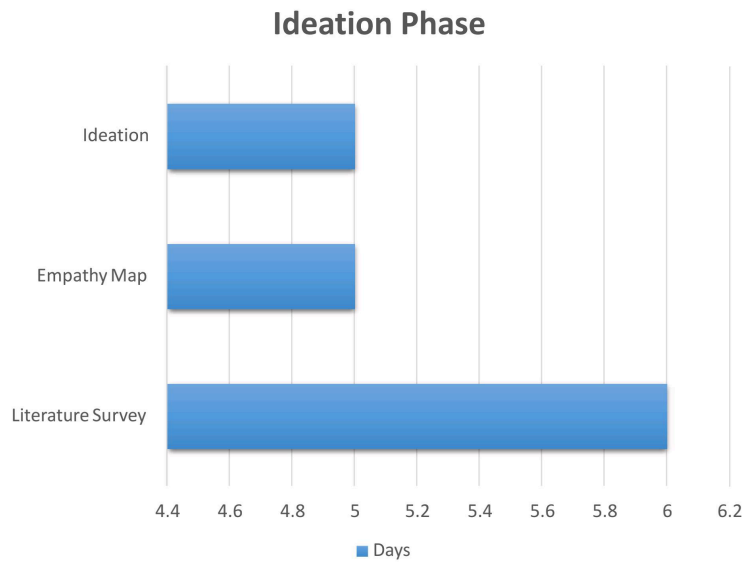

29th August – 17th September

Ideation Phase

Literature Survey On The
Selected Project &
Information Gathering

Prepare Empathy Map

Ideation

Project Design Phase 1

19th September – 1st October

Project Design Phase - I

Proposed Solution -
Days 2

- Problem Solution Fit

Solution Architecture

Project Design Phase 1

Project Planning Phase

Prepare Milestone &
Activity List

Sprint Delivery Plan

Project Planning Phase

Project Development
Phase

24th October – 19th
November

Project Development
Phase

Project Development -
Delivery Of Sprint-1

Project Development -
Delivery Of Sprint-2

Project Development -
Delivery Of Sprint-3

Project Development -
Delivery Of Sprint-4

Project Development Phase

PROJECT MILESTONES

PHASE 1:

- Register for the application by entering email , new password and confirming the same password
- Receive confirmation email once I have registered for the application.
- Log into the application by entering email and password / Google Auth

PHASE 2:

- Update the salary at the start of each month.
